The way we work has changed. The days of the process worker doing one task at one desk are gone. The days of the knowledge worker have arrived and are here to stay. Working on a diverse range of tasks throughout the day, from focused individual work through to open collaborative work and everything in between. Technology has advanced to the point where people are connected everywhere they go. The ability to check a work email from home or have a business meeting with someone on the other side of the world provides great possibilities for the future of work. So shouldn't our office environments reflect this?

Moto is about providing the workplace with a family of products to better suit the diverse range of tasks that workers of today are facing. It's about empowering employees to choose a space that will work for them. This could be a private work pod to complete a high focus task, a team workspace to provide training to your staff, or an open collaborative area to build stronger working relationships. Designed with flexibility and customisation in mind, Moto can provide a range of spaces with our system of office furniture. Because no two workplaces are the same.

Range of Spaces

Throughout a normal working day a number of diverse tasks are undertaken. Tasks range from High to Low Focus and from Individual to Collaborative. Our furniture provides workers with a range of effective environments to match each unique task.

Moto Settings **Individual**

Moto individual work spaces provide effective settings to complete high focus individual tasks. A range of creative layouts are available to suit differing space and privacy requirements.

Shell

Moto Shell work pods provide a very high level of acoustic and visual privacy, allowing workers to complete focused individual tasks in a comfortable enclosed environment.

Zip

Moto Zip work pods provide a high level of acoustic and visual privacy, allowing workers to complete focused individual tasks in a comfortable environment.

Wave

Moto Wave work pods provide a good touch down space for individual tasks. They are very space efficient, providing a small amount of acoustic and visual privacy for workers.

Link

Moto Link freestanding phone booths provide workers with a private acoustic space to make phone/video calls. A standing height tabletop provides space for laptops or notebooks if necessary. Link is designed to keep noise from the outside out, while also enclosing the user to prevent them from distracting others in the workplace.

Link

Moto Link wall-mounted phone booths provide workers with a small private space to make phone/video calls. A standing height table top provides space for laptops or notebooks if necessary.

Moto Settings

Collaborative

These collaborative work spaces are designed to provide a focused area to complete group tasks effectively. Barriers provide acoustic and visual separation and privacy from other workers.

Meeting

Moto Meeting is a four seater booth which provides a high level of privacy for users. This enclosed setting is ideal for anything from focused brainstorming sessions to client meet and greets.

Team

This shared workspace is ideal for teams of up to four to cluster, providing a focused zone for individual work with the ability to easily collaborate with the people nearby. Moto Team is designed to create a defined zone for individuals who collaborate regularly throughout the day.

Arc

Moto Arc provides space for people to collaborate together, and comes with the option of additional privacy walls to enclose the space and provide a high level of privacy for workers.

Arc

Moto Arc provides space for people to collaborate together, and comes with the option of additional privacy walls to enclose the space and provide a high level of privacy for workers.

Disc

Moto Discs are perfect for open spaces, providing comfortable individual seating spaces in a 360° range.

Expo

Moto Expo is ideal for workplace presentations, providing two defined tiers for workers to gather around. The walls provide some acoustic privacy and help to define the area for its use. The bar leaner height desks provide space for laptops or notebooks as required.

Grandstand

Moto Grandstand provides tiered seating for anything from quick meetings and presentations to relaxation. Available in the full Moto Felt range, the Grandstand modules can provide visual interest to any space.

Ring

Moto Ring provides a great private space for standing meetings. The large two way acoustic walls keep the meeting private, while blocking out distracting workplace sounds from the outside.

Moto Settings **Flexible**

Our range of soft seating provides areas for people to socialise or complete short mobile tasks in a relaxed environment. These products can be positioned to direct flow or add interest to an open plan area.

Canopy

Moto Canopy seating can be arranged to create meeting spaces or be used as quiet spaces to complete short individual tasks. The large acoustic panels and roof provide a very good level of privacy in the busy work environment.

Wing

Moto Wing seating can be arranged to create meeting spaces or be used as quiet spaces to complete short individual tasks. The acoustic wings provide acoustic privacy with a more unique bold aesthetic.

Wing

Moto Wing seating can be arranged to create meeting spaces or be used as quiet spaces to complete short individual tasks. The acoustic wings provide acoustic privacy with a more unique bold aesthetic.

Fin

Moto Fin seating can be arranged to create open meeting areas or be used as spaces to complete short individual tasks. The low back creates an open welcoming environment for workers to relax as well.

Loop

The range of Moto Loop seating allows for endless layout possibilities to suit any environment. Creating waiting room areas or collaborative zones is easy with simple loop forms.

Tables

Moto Tables are designed to compliment Loop seating items by referencing the same aesthetic, replace a Loop with a table to add interest and storage space. The Tablet Table is designed to fit alongside the entire Moto range. Ideal for using a laptop or notebook, and Coffee Tables provide a large surface area, creating space for staff to gather around and share ideas.

Otto

Moto Otto is the smallest member of the Moto family. Castors on the base provide a mobile option to create clusters or add seating to any desired area.

Moto Settings

Custom

Moto system is designed with customisation in mind, we offer a range of colours providing a unique finish to suit any client needs. There are a range of power and data options available to provide connectivity for your workforce.

Moto Felt

Available in 10 colours our Moto Felt is designed for heavy commercial use (100,000+ martindale rubs) and provides excellent sound absorption.

Surfaces

Moto worktops are available in two different finishes, lacquered white and solid beech timber and are finished with a smooth shark nose edge.

Power & Data

There are a number of flexible power and data options available with Moto to keep you connected. Cable ports allow wires to run through screens and pixels provide power and data points to plug into directly.

Warranty

Frame: 10 years
Fabric: Moto Felt 5 years

Delivery Times

Stock Items: Finishes/combinations shown in this pricelist - 10 days
Standard Projects: Standard components, alternate mix of 'Moto Felt' / Eurotex PU upholstery - 70-80 days
Custom Projects: Non-standard components or non-standard upholstery - 100 days

Assembly

Assembly is required for the majority of Moto products and is not included in the product price.

Acoustics

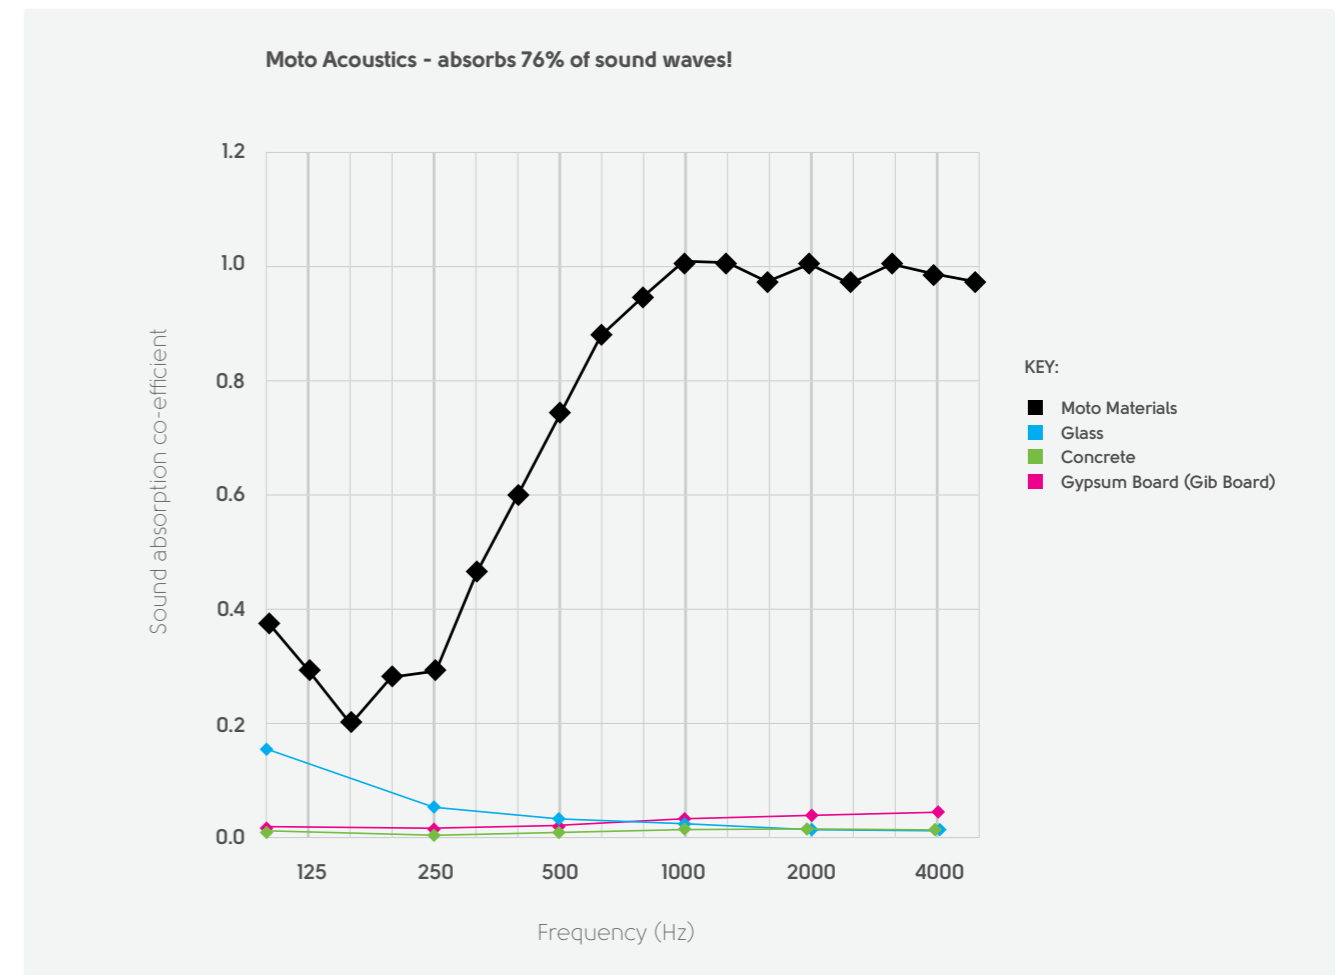

Standard wall materials absorb 3%, Moto has been tested and absorbs 76% of sound waves!

Imagine standing in the middle of a room with all concrete surfaces and one open window, and you blow a loud whistle. The sound that hits the open window passes right through. The sound that hits the concrete surfaces in the room begin to reflect back. The NRC (Noise Reduction Coefficient) of the open window would be 1.00 which is the absence of sound reflection. The NRC of concrete is .03, indicating that 97% of the noise that hits the concrete surfaces will reflect back off the surface. The NRC value of a surface simply denotes its ability to absorb vs reflect sound. The higher the NRC value, the stronger the sound absorption and the lower the sound reflection in the room.

Moto panels have an NRC rating of 0.76 which means that 76% of the sound wave entering into the material will be captured and converted. Moto dramatically contributes to reduction of noise bleed in open plan environments!

Acoustics

Moto Felt Moto Felt can be used to upholster all Moto products.

Moto Felt is a wool blend textile with a soft hand and contemporary colour-ways that will add a subtle, elegant distinction to larger, upholstered furniture items. Moto Felt is yarn dyed and has been milled to give it a direction-less felted appearance. The milling process also increases the inherent durability and water repellent properties, which along with the natural flame resistant properties of wool, makes this fabric very suitable for heavy commercial use.

Technical Specifications

Type:	Upholstery
Composition:	50% Wool 50% Polyester
Weight:	750g/lin.m
Roll Width:	150cm
Repeat:	None
Abrasion:	100,000 rubs (Martindale)
Pilling:	4-5, BS EN ISO 12945-2:2000
Light Fastness:	4-5, BS EN ISO 105-B02
Flammability:	BS EN 1021.1 (cigarette) BS EN 1021.2 (match) CAL TB 117-2013
Colour Matching:	Batch to batch variations in colour may occur within commercial tolerances

Maintenance & Cleaning

Wool is naturally anti-static and water repellent making it less likely to attract dirt and absorb spillages. It is important to keep the fabric clean as this will extend the life of the fabric and preserve its fire retardant properties. Frequent (weekly) vacuuming on low suction is advised to remove dust and loose soiling. Under normal commercial use we recommend cleaning 1-3 times yearly by a professional dry cleaning service. It is important to protect the fabric from direct and refracted sunlight as this will ensure that the fabric retains its original colour.

Spot Cleaning

Soiling should be acted on immediately to prevent lasting damage to the fabric. We always recommend testing stain removal detergents and solvents on an inconspicuous area first.

- Immediately absorb any liquids with an absorbent cloth.
- Scrape off any solidified material with a spoon.
- Remove loose material with a vacuum cleaner on low power.
- Wipe clean with a damp cloth using pH-neutral upholstery shampoo (follow directions on packaging). Do not scrub or use a stiff brush.
- Use clean water without any cleaning product for the final clean.
- Do not use dish washing or laundry detergents. Do not use detergents, bleach, ammonia or soap intended for hard surfaces.
- Dry with a clean white cloth using a circular dabbing motion to avoid edge marks. Use of hair dryer may also help avoid edge marks.
- Allow to dry thoroughly before reusing.

This is intended as a guide only. We recommend consultation with a fabric care professional.

Environmental

As a caring, corporate citizen, we support the responsible stewardship of the earth, its inhabitants and its resources. Our fabrics are designed and made to last, and in their manufacture, use and disposal, embody the environmental principles of Reduce, Reuse & Recycle. Fire retardants are bromide free. Dyes are free from heavy metals.
